DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 28-44 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: ***“A computer readable medium storing instruction”; “a memory in communication with the processor”***.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim*** withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ***“the duration of the second haptic feedback being greater than the duration of the first haptic feedback”; “the magnitude of the second haptic feedback being less than the magnitude of the first haptic fedback”*** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 45 objected to because of the following informalities: in claim 45, lines 7 "less then" should have been "less than". Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-27 are allowed.
4. Claims 11-27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
5. The following is an examiner's statement of reasons for allowance: the prior arts has failed to teach the recited claim invention *"enabling the output of a tactile sensation during said, said tactile sensation being based on a periodic waveform and having a frequency correlated with a size of said graphical object interacted with said cursor"; "causing the cursor to snap to said graphical object when said cursor is within a predetermined distance of said graphical object in said graphical environment so that said cursor is displayed touching said graphical object and said cursor can be moved along or within said graphical object based on user manipulation of said hap tic feedback device; and enabling the output of a vibration sensation to the user while said cursor is moved along or within said graphical object"; and "enabling the output of a pop sensation, said pop sensation being a short, high magnitude sensation; and enabling the output of a dinging sanitation during or immediately after said output of said pop*

sensation, said ringing sensation being commanded using a periodic waveform and having a longer duration and lower magnitude than said pop sensation”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
